1. Installation procedure

Each of the electronic invoices issued by IATA is electronically signed in compliance with the national provision in the law of the EU Directive 2001/115/EC. In order to verify the signature of the invoices, you will need to perform the steps described in Section 1.1. Then, depending on the version of Acrobat Reader you are using, follow instructions in Sections 1.2 or 1.3.

1.1. Root and Issuing CA Certificate download

Download and import the two certificates in Internet Explorer. Please follow the steps below to install each of the root and issuing certificate CA certificates listed above:
- Click on the link of the root/issuing CA certificate to be installed.
- Click the open button in the dialog box.
- In the **Digital Certificate** dialog box, click on **Details** to view the information of the root/issuing CA certificate.
- Click on install Certificate to install the root/issuing CA certificate.
- In the **Certificate Manager Import Wizard** dialog box, click on **Next** and select "Automatically select the certificate store based on the type of certificate" option.
- Click **Next** and then **Finish**.
- Follow instructions in Section 1.2 if you are using Acrobat Reader 6.0.
- Follow instructions in Section 1.3 if you are using Acrobat Reader 7.0.

1.2. Instructions for Acrobat Reader 6.0

- In the **Preference dialog box**, select **Digital Signatures** on the left, and then click on **Advanced Preferences**.
- In the **Microsoft Windows Certificates Security** box, do the following:
  - Specify that you want to import and use identities from the Windows Certificate Store
  - Specify that you want to trust all root certificates for both 1) validating signatures and 2) validating certified documents.

1.3. Instructions for Acrobat Reader 7.0

- In the **Preference dialog box**, select **Security** on the left, and then click on **Advanced Preferences**.
- Click **the Windows Integration** tab, and do the following:
  - Specify that you want to import and use identities from the Windows Certificate Store
  - Specify that you want to trust all root certificates for both 1) validating signatures and 2) validating certified documents.
